

Week 01- Minor Project

Multi-page Personal Portfolio (HTML)

Introduction

The Multi-page Personal Portfolio is a basic web development project created using HTML5. The project focuses on building a personal website consisting of multiple interconnected pages to showcase personal details, skills, projects, and contact information. This project helps in understanding the fundamentals of web development and website structure.

Objectives

- To learn the basics of web development.
- To understand HTML5 semantic elements and page structuring.
- To create multiple linked web pages using navigation menus.
- To practice version control using Git and GitHub.
- To develop a responsive and organized portfolio website.

Technologies Used

- HTML5 – For webpage structure and content.
- Git – For version control and project tracking.
- GitHub – For hosting and managing the project repository.

Features

- Home page with personal introduction.
- About page describing education and interests.
- Skills page displaying technical skills.
- Projects page showcasing completed works.
- Contact page with basic contact details.
- Navigation bar for easy page switching.

Focused Areas

1. Web Fundamentals

The project covers basic concepts such as webpage structure, hyperlinks, navigation, and content organization.

2. HTML5

HTML5 semantic tags like `<header>`, `<nav>`, `<section>`, `<article>`, and `<footer>` are used to improve readability and webpage structure.

3. Git/GitHub

Git is used to manage project versions, while GitHub is used to store and share the project online.

Submission Format

- Students must submit their project before the given deadline.
- Submission can be done using:
 - GitHub Repository Link
 - Google Colab Link (if applicable)
- The submitted link should be accessible and properly organized.

Submission Procedure

1. Login to your account.
 2. Go to **My Course**.
 3. Click on **Main Program**.
 4. Select Modules.
 5. Click on the **Minor Project** module.
 6. Select **Minor Project 01** and go through the project topic.
 7. Open the **Minor Project Submission Link** folder.
 8. Submit the **GitHub/Google Colab link** in the provided Google Form before the deadline.
- **Late submissions may not be accepted without prior approval**
